**FACILITIES DEVELOPMENT**

It is the aim of the Board to maintain, modify, and review use of facilities so that the Division will better meet the educational requirements of the community both today and into the future. The Superintendent and the Buildings and Maintenance Committee of the Board shall develop long-range planning for the school sites and facilities and make recommendations to the Board on these matters.

The objectives of the long-range planning are:

1. To improve the educational environment for students and teachers by reviewing the physical standards in all buildings.
2. To create school complexes which are the best possible balance of effective grouping of educational resources, efficient management and operations, and community concerns for the character of the school system.
